DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, 51-54, 71-72, 76-77 and 81-82, drawn to a wireless system, operable with a plurality of remote stations capable of transmission on a shared resource, classified in class 455, subclass 454.
 - II. Claims 15-41, drawn to a station with a decoder, classified in class 455, subclass 450.
 - III. Claim 42 and 44, drawn to a station with a message encoder, classified in class 455, subclass 515.
 - IV. Claims 43 and 45-50, drawn to an access message and a grant message, classified in class 370, subclass 350.
 - VI. Claims 55-57, 73, 78 and 83, drawn to a method with transmitting to the remote station a negative acknowledgement command, classified in class 455, subclass 517.
 - VII. Claims 58-71, 74-75, 79-80 and 84-85, drawn to a method transmitting a portion of data from data buffer in response to a decoded access grant, classified in class 370, subclass 329.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-VII are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a wireless system,

operable with a plurality of remote stations capable of transmission on a shared resource. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
